

# How *VibraLITE*<sup>®</sup> can help with:

---

## BOATING

Even during recreation times such as boating, we need reminders to check engine rooms, start or stop our “watch”, take our medication, be reminded to stretch or change positions.

It is vital to check a yacht's engine room very regularly while under way. (raw-water pumps, all exhaust components, turbocharger) Remembering to do these checks as often as needed will not be problem with the help of the “VibraLITE” vibration alarm watch. Set the Auto Repeat Countdown Timer and vibrations on your wrist will remind you each and every time without resetting.

When crewing and doing your “watch”, the “VibraLITE” can be your “wake up call” without disturbing other sleeping crew, even if they are in the same cabin.

High Noise Levels from engines running often make it impossible to hear an audible alarm. Using the “VibraLITE” vibration watch allows you to be alerted or reminded even when an audible alarm cannot be heard.

Set the Countdown Timer for the required amount of time (i.e. every hour to check the engine room or every 4 hours for your “watch” shift etc.) The Auto-Repeat Feature on the Countdown Timer will automatically reset and countdown for the preset time each time it reaches zero. These “interval” reminders are preset once and continue to repeat until you turn the countdown OFF with a push of a button.

You can also preset alarms for daily reminders such as Medication Times, waking up or performing Tasks. The alarm(s) will alert you each day at your preset times.
